## AIWIBI STORY

Babies need more meticulous care! It is the deepest feeling of Jenifer' s long career. As an experienced newborn care specialist, Jenifer knows more about how vulnerable a newborn is and the importance of health to a small baby than anyone. Therefore, when she is free, she always spends much time in studying baby products on the market, looking for those which can meet her philosophy in 'meticulous care' . Because of her professional knowledge in baby products and newborn care, she also served as a consultant for several baby products companies, assisting in the development of baby products. In 2013, Jenifer started her own business with her friends in Hong Kong, concentrating on developing nursing products.

After birth of her daughter, Jenifer' s heart was filled with a special feeling, both of a mother' s love for her child and a newborn care specialist' s special emotion to newborn baby. This feeling deepened her understanding of the concept 'meticulous care' , raised her requirements for the quality, safety and comfort of baby products further. She found that her company' s existing baby products could not satisfy her, therefore she went back to Australia and reorganized a development team to focus on improving and developing baby products with tougher standard, and founded the brand - Aiwibi. This brand not only contains Jenifer' s love for her daughter and special emotions to newborn babies, but also her philosophy in 'meticulous care for babies' . She wishes to pass on her feelings and philosophy to others through the brand, so that more newborn babies can receive more meticulous care.
